The Ultimate in Hotel Guest Room Connectivity

The MediaHub Pro employs the latest technology to provide guests with the most important, universally accepted mobile connections so they can make the most of their hotel stay.

Bluetooth Audio

With Bluetooth audio, guests can stream their favourite audio from their mobile devices straight to the in-room TV..

HDMI

Display 4K video by simply connecting to the HDMI port, MediaHub Pro takes care of the rest!

USB-C

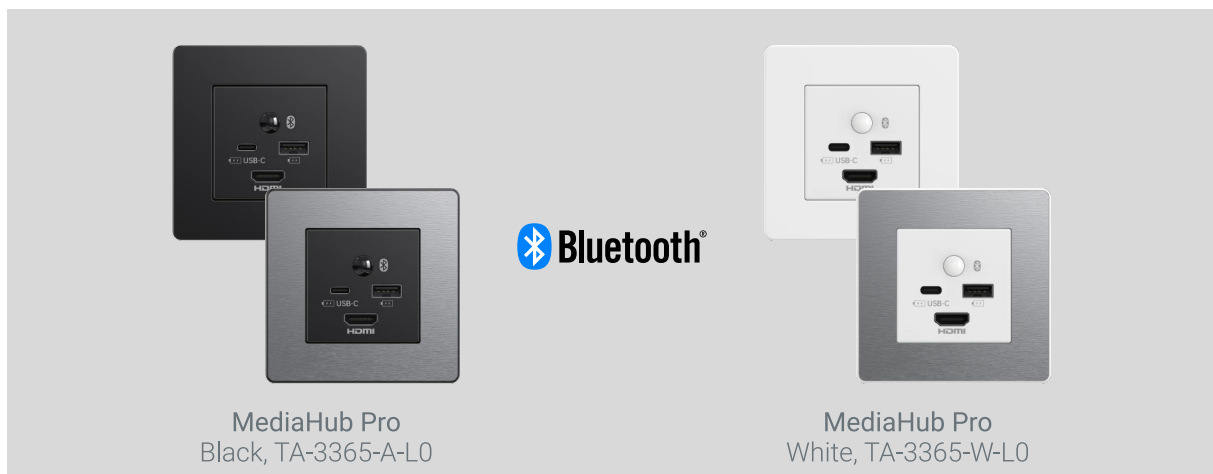

USB-C allows guests to charge their devices up to 5V/3A.

USB-A

USB-A is provided for additional charging. A product variant is available to support USB-A passthrough if required, please enquire for further details.

Finishes and Trims

MediaHub Pro is finished in either black or white, it is supplied with two matching trims (one solid color, the other brushed for maximum choice right out of the box. MediaHub Pro is of course also compatible with our range of customized trims and PowerHub extenders.
